CASCADING IMAGES

AIM

To design a webpage that cascades images using Javascript.

CODE

```
<Html> <head>
<style>

body, html {

    background : url ('Pgm1105.jpg')
                    no-repeat center center fixed;

    background-size : cover;
    }
img {   width : 25%;

        height : 25%;

    }
```

```
, byground {

    min-height : 100vh;
    display : flex;
    justify-content : center;
    align-items : center;
}

</style>

<script>

    var i=1;

    function    display()
    {
            if( k ===1)
                document.getElementById('image').secc

                            = 'ol.png';

        else   if(k ===2)

                document.getElementById("image").src

                    = "02.png";

        else   if(k===3)

                document.getElementById('mage').sx

                    = "03.Png";

            else
                k=0;
```

```
        k++;            setTimeout (display ,2000);
  }

  <head>
  </head>
                                    display()
  <Body   Onload = "setInterval (display , 500)" >

      <div   class = 'bground '>

            <img  alt = 'No img'      id='image'>

      </div>

  </Body>
  </Html>
```
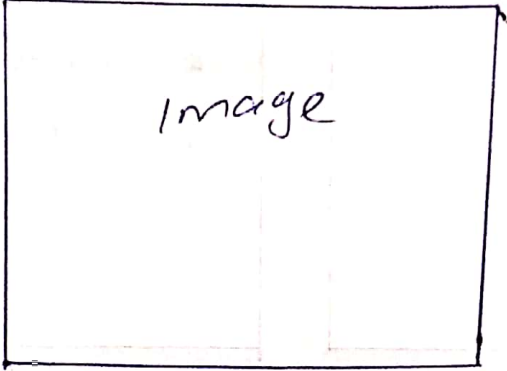

RESULT

The pgm was successfully executed.
